ABOUT ALEXANDER BACHOR

Introduction

ABOUT ME

Hey, I am Alex,

I was born in February 21st, 1992 and grew up in Lübbecke (close to Bielefeld). After my graduation in Graphic and Print Production in 2013, I came to Berlin to study Communication Design.

Since my early youth I was thrilled by good design—whether products, packaging, architecture or interior. But especially I was interested in analog and digital media. So I started to learn designing on my own and later also to code (non-professional) out of curiosity. This curiosity remained until today which helps me to stay up-to-date and I am still improving myself to ensure I can deliver the most useful and effective solutions.

Problems are made to solve.

That's my credo and I am passionate about building and designing thoughtful experiences. As technology progresses things are getting more and more complex. As a designer, I have the ability to make these complex contents simple, delightful, easy to consume and to use every day.

DESCRIPTION

Condor Versicherungen, which was founded in Hamburg, has been part of R+V Versicherung from Wiesbaden since 2008. Condor Versicherungen feels a special connection to the Hamburg location and the Hanseatic values. Condor has always worked exclusively with independent brokers — they receive an annual calendar which is over one meter wide with 12 motifs plus title. The Hanseatic world always plays an important role in the motifs, particularly from Hamburg.

DESCRIPTION

WILHELM makes insuring smarter. In the Web and by App. With WILHELM you get a quick overview of all your insurance contracts and you can optimize them directly in the app, if required. WILHELM is part of the cooperative financial group Volksbanken Raiffeisenbanken. Besides the positioning and naming, we created a new brand design which is nearly based on the brand design of Volksbanken Raiffeisenbanken.

DESCRIPTION

FC Viktoria 1889 Berlin is a German football club whose 1st men's team plays in the fourth highest division and with about 1600 active members it is one of the largest in Germany.

Unfortunately the club has gone through a turbulent period after an insolvency. In order to strengthen the club externally, we have repositioned the club with an image campaign which aims to win fans for the club and to attract them to the stadium.

The core idea of the campaign is to establish the club as the "second best club in the world". In Berlin live many newcomers who probably already have their favourite club. So we have made FC Viktoria 1889 Berlin a club, with still hard and real football, attractive as a second favourite club to the new Berliners.

DESCRIPTION

The task was to create an approach concept for brokers and Volksbanken Raiffeisenbanken stores on the topic of „Cyber Security“ for medium-sized companies. R+V Versicherung offers various concepts to protect companies. Furthermore, R+V Versicherung sees itself not only as an insurance company, but also as a comprehensive partner in IT and data security.

DESCRIPTION

I am an enthusiastic „carsharer“ and I regularly use one of the local providers like SHARE NOW (formerly DriveNow & Car2go) or SIXT Share. I really love the business modell of MILES, because you pay by kilometers not by minutes. The point which motivated me to this study is the app. It is undoubtedly the most important touch point between customer, brand and the service itself. But the app needed an improvement, and that's what I focused on. I don't want to invent something completely new, but I want to improve the user experience and increase the interest and fun of using the app.

DESCRIPTION

Dr. Oetker, founded in 1891, is known for its wide range of food products. From baking ingredients to frozen pizzas and desserts, Dr. Oetker offers products in over 40 countries. The brand is particularly popular for its baking mixes and frozen pizzas. In challenging times, when even companies like Dr. Oetker struggle to find new employees, our task was to develop a guiding slogan and a corresponding campaign design.

Alexander Bachor

YEAR

2019

DESCRIPTION

When I was a student, I regularly travelled between Berlin and my old home town Bielefeld by train and I often used the DB Navigator App. Technically, the app is a success, but from a creative and informative point of view it is not. The app seems a bit outdated. All contents of Deutsche Bahn website were implemented into the app without any consideration for usability. This makes the app too difficult to understand and confusing. I changed the design of the app and tried to merge entries and different options and to emphasize the main features of the app more.

DESCRIPTION

DHL is known as one of the largest global player in delivery and transportation of goods and parcels. It is active in around 200 countries and delivers the huge amount of 1,502,000,000 parcels a year. It is a brand with thousands of touch points which work well in general. As online shopping and deliveries are growing, more and more people use tracking apps for their orders and shipments.

So there is a reasonable importance of a well working tracking app. Technically, the DHL app works very well, but the user experience and design of the app are frustrating.

So I challenged the current app version to create a modern service design which represents the high claims of a global company like DHL. The Outcome is a minimal design which makes the use of the app more exciting and also more comfortable.
